

I am concerned about MB Docket No. 04-233. The primary radio station I listen to in Omaha, NE is K-LOVE radio broadcast via an FM translator station.

K-LOVE radio provides valuable family-friendly programming I greatly value and enjoy. There are not many radio stations that can boast wholesome, positive, and encouraging content. I would be deeply disappointed to lose reception of this radio station due to LPFM interference. I am sure others in my community would be as well.
